

## Vote for Three Catalog of Standard Entries Is Extended

Given the complexity of the IEC 61850 entries proposed for inclusion in to the catalog of Standards, it has been decided by the Plenary Officers to extend the voting until May 4<sup>th</sup>. This will allow Voting Representatives time to cast or revise their votes. Once again, the three standards are (click name for a summary page):

- **IEC 61850** – this has been broken into 13 parts and an Introduction page for review. Please note that Parts 7-2, 7-3, and 7-4 are updated references. Voting Representatives, you want to review these sections specifically and see if any change your vote (which you can do simply by re-casting your ballot).
  - Introduction and overview (<http://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/SGIPCosSIFIECTR618501>)
  - Part 7-2: Basic information and communication structure – Abstract communication service interface (ACSI) (<https://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/SGIPCosSIFIEC6185072>)
  - Part 7-3: Basic communication structure – Common data classes (<https://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/SGIPCosSIFIEC6185073>)
  - Part 7-4: Basic communication structure – Compatible logical node classes and data object classes (<https://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/SGIPCosSIFIEC6185074>)

Again, Voting Representatives are encouraged to review their vote and consider each of the additional 61850 parts (above) to determine whether these 3 additions change their decision on whether to include IEC 61850 in the SGIP Catalog of Standards.

- **IEEE C37.239-2010**
- **OASIS Energy Interoperation**

VOTING DEADLINE: this ballot will close on Friday, May 4 at 11:59p.m. Eastern.
